Jersey City, NJ | 302-312-3276 | jeetd6220@gmail.com | [LinkedIn](#) | [Portfolio](#)

PROFILE

Data engineering-focused MS Data Science student with hands-on experience developing automated ETL/ELT pipelines (with monitoring and alerting) using Python, Spark, SQL, and AWS services (S3, Glue, Lambda, Step Functions, SNS, SQS, CloudWatch). Skilled in dimensional data modeling, DDL, and data warehousing best practices, with a track record of building data quality frameworks — validation, reconciliation, and anomaly detection — plus data cataloging and metadata documentation for trusted, discoverable data assets. Comfortable partnering with cross-functional teams to gather requirements and deliver reliable data solutions.

PROFESSIONAL EXPERIENCE

NexGits Private Limited — Data Analyst Intern

Ahmedabad, India | Jun 2024 – Jul 2025

- Designed ETL pipelines in Python and SQL to extract, transform, and load structured data across multiple relational tables, identifying and resolving data inconsistencies and reducing prep time by 30%.
- Partnered with senior stakeholders to gather requirements and deliver interactive Power BI, Tableau, and Excel reporting solutions that directly informed 3 strategic decisions within the first month.
- Automated recurring data processing workflows using Python on AWS, improving pipeline reliability and reducing manual effort by 40%.

ACADEMIC & PERSONAL PROJECTS

FraudSentinel — Automated ETL Pipeline with Monitoring & Alerting

Mar 2026 – Apr 2026

- Built automated ETL pipelines across 10 AWS services (S3, Glue, Lambda, Step Functions, SNS, SQS, DynamoDB, CloudWatch, SageMaker) processing 507K+ transactions with zero dead-letter-queue failures across all runs.
- Designed a Bronze-Silver-Gold data lake with AWS Glue PySpark jobs and automated data catalog registration, maintaining metadata for trusted, discoverable data assets and query-able Athena SQL tables.
- Built a data quality framework with anomaly detection (XGBoost classifier, AUC: 1.00) and automated SNS alerting, delivering structured notifications and reconciliation checks in under 30 seconds.

Retail Analytics Pipeline — Dimensional Modeling & Data Quality

Oct 2025 – Nov 2025

- Designed and built a cloud data warehouse using Snowflake, Snowpark Python, and dbt Core — 6 dimensional (fact/dimension) data models with 52 passing data-quality and reconciliation tests — using DDL and physical/logical modeling best practices.
- Optimized SQL transformations and dbt models to improve data quality, query performance, and downstream analytics reliability.

Kubernetes Data Platform — Distributed ETL Pipelines on AWS EKS

May 2026 – Aug 2026

- Built automated ETL pipelines on Kubernetes (AWS EKS) using Python, Spark, and Airflow orchestration, with infrastructure and IAM access controls provisioned as code via Terraform.
- Monitored and resolved pipeline reliability issues under cluster autoscaling conditions, maintaining consistent data delivery through a Bronze/Silver/Gold medallion architecture.

TECHNICAL SKILLS

- ETL/ELT & Pipeline Engineering:** Python, Spark, PySpark, SQL, PL/SQL, DDL, Automated Monitoring & Alerting
- Big Data Technologies:** Hadoop, Hive, Apache Spark, PySpark, AWS EMR
- Data Modeling & Warehousing:** Dimensional Modeling (Fact/Dimension Tables), Data Warehousing, Data Partitioning, Query Performance Optimization
- Data Quality & Governance:** Data Quality Frameworks, Validation & Reconciliation, Anomaly Detection, Data Cataloging, Metadata Documentation, Access Controls (IAM)
- Cloud & AWS Services:** AWS (S3, Glue, Lambda, Step Functions, SNS, SQS, CloudWatch, Athena, SageMaker, EMR), AWS Redshift, Kubernetes, Docker, Terraform
- Databases:** Snowflake, MySQL, PostgreSQL, DynamoDB
- Collaboration:** Git/GitHub, Cross-Functional Collaboration, Requirements Gathering

EDUCATION

New Jersey Institute of Technology — MS in Data Science | GPA: 3.5

Newark, NJ | Expected May 2027

Indus University — BS in Computer Science & Engineering | GPA: 3.8

Ahmedabad, India | May 2025

CERTIFICATIONS

AWS Machine Learning | Amazon Web Services | Jul 2024 – Nov 2024
