PROFILE

Business data analyst-focused MS Data Science student with hands-on experience transforming operational data into actionable insights — executing end-to-end data preparation, maintaining reporting deliverables, and supporting deep-dive analyses. Skilled in SQL and Python for statistical problem solving, with direct experience designing experiments (A/B testing, causal inference) and applying data governance practices to identify and correct data quality issues. Comfortable using AI-assisted tools to accelerate analysis and documentation, and communicating recommendations clearly to senior stakeholders and non-technical audiences.

PROFESSIONAL EXPERIENCE

NexGits Private Limited — Data Analyst Intern

Ahmedabad, India | Jun 2024 – Jul 2025

- Executed end-to-end data preparation in Python and SQL across multiple relational tables, identifying and resolving data inconsistencies to ensure data integrity and reduce prep time by 30%.
- Partnered with senior stakeholders to gather business requirements and maintain reporting deliverables (Power BI, Tableau, Excel), directly informing 3 strategic decisions within the first month.
- Automated recurring data processing workflows using Python, improving reliability and reducing manual effort by 40% to support faster, more consistent business reporting.

ACADEMIC & PERSONAL PROJECTS

Causal Inference & A/B Testing — Experiment Design & Measurement

May 2026

- Designed and analyzed a 90,189-user A/B test measuring the impact of a product change on retention, applying sample-ratio-mismatch checks and significance testing to identify a statistically validated business opportunity.
- Developed a statistical model (Difference-in-Differences) to measure the causal impact of a real-world business disruption, quantifying a treatment effect (+12.44pp, 95% CI [7.44, 17.44], $p < 0.0001$) and validating it with a placebo test.
- Published full analysis and code: github.com/jd878-gif/causal-inference-ab-testing

E-Commerce Data Pipeline — Business Opportunity Analysis & Scenario Modeling

Feb 2026 – Apr 2026

- Analyzed 100K+ records to identify business opportunities, building statistical models — Sales Forecasting (Linear Regression), Customer Churn Prediction, and K-Means Segmentation — to support what-if scenario planning across 4 customer segments.
- Delivered an interactive Tableau dashboard with live KPI filters, translating complex analysis into clear, actionable recommendations for non-technical stakeholders.

Retail Analytics Pipeline — Data Governance & Quality

Oct 2025 – Nov 2025

- Applied data governance best practices to identify and correct data quality issues across 6 dimensional data models, executing 52 validation and reconciliation checks to ensure trusted, accurate reporting data.
- Assisted in data modeling using Snowflake, dbt Core, and DDL best practices to support downstream business analysis and reporting.

FraudSentinel — Data Integrity & Anomaly Detection

Mar 2026 – Apr 2026

- Built a data quality framework with anomaly detection (statistical model, AUC: 1.00) and automated alerting, identifying and correcting data issues across 507K+ records to ensure strict data integrity.

TECHNICAL SKILLS

- Analytics & Statistics:** SQL, Python, R, Statistical Problem Solving, Experimentation Design, A/B Testing, Causal Inference (DiD), Regression, Classification, Clustering
- Business Reporting & Visualization:** Power BI, Tableau, Excel, Streamlit, Dashboard Development
- Data Quality & Governance:** Data Quality Frameworks, Validation & Reconciliation, Anomaly Detection, Data Integrity
- Data Modeling:** Dimensional Modeling, Data Warehousing, DDL
- AI-Assisted Analytical Tools:** AI-Assisted Development, Documentation & Reporting Acceleration
- Collaboration:** Cross-Functional Collaboration, Requirements Gathering, Stakeholder Communication, Git/GitHub

EDUCATION

New Jersey Institute of Technology — MS in Data Science | GPA: 3.5

Newark, NJ | Expected May 2027

Indus University — BS in Computer Science & Engineering | GPA: 3.8

Ahmedabad, India | May 2025

CERTIFICATIONS

AWS Machine Learning | Amazon Web Services | Jul 2024 – Nov 2024
