PROFILE

MS Data Science student at NJIT with a BS in Computer Science and Engineering, with hands-on experience designing, building, and maintaining software tools for data processing, analysis, and automated workflows. Strong programming ability in Python, with applied experience in databases, REST APIs, and cloud infrastructure (AWS), and a solid foundation in data structures and algorithms. Quick learner with a track record of picking up new tools and technologies fast, and an eagerness to deepen my understanding of financial markets and trading systems.

PROFESSIONAL EXPERIENCE

NEXGITS PRIVATE LIMITED

Ahmedabad, India

Data Analyst Intern

Jan 2025 to Jun 2025

- Designed and maintained software tools to process and analyze large datasets; **built ETL pipelines** in Python and SQL, **reducing data preparation time by 30%** and improving reliability of downstream data workflows.
- Built dashboards and analytics tools to support data-driven decision-making; **developed interactive Tableau, Power BI, and Excel dashboards** tracking key metrics, surfacing insights that directly informed **3 strategic decisions** within the first month.
- Debugged and optimized automated workflows to improve performance; **automated feature engineering pipelines** on AWS (S3, EC2) for Linear Regression, SVM, and Gradient Boosting models, **cutting manual preprocessing effort by 40%** and improving consistency across the platform.

ACADEMIC & PERSONAL PROJECTS

E-Commerce Data Pipeline

Feb 2026 to Apr 2026

- Built systems to process and analyze large-scale data to support decision-making; **architected an end-to-end ETL pipeline** handling **100K+ records** across 4 relational tables using Python, Pandas, and MySQL, with automated daily batch cycles via Apache Airflow DAGs.
- Translated analytical questions into working, production-style systems; **built and tested 3 models** covering Sales Forecasting (Linear Regression, R^2 : 0.65), Customer Churn Prediction (SVM, 63% accuracy), and K-Means Segmentation, **enabling data-driven targeting across 4 customer segments** (VIP, Regular, At-Risk, Dormant).
- Built an analytics dashboard and automated reporting workflow; **delivered an interactive Streamlit and Plotly dashboard** with live KPI filters, then **containerized via Docker and deployed on AWS EC2** for reliable, scalable performance.

Library Management System

Dec 2025 to Jan 2026

- Designed, developed, and maintained a multi-component software system end-to-end; **architected a 6-layer application** using Python, Flask API, MySQL, ETL processing, Docker, and Airflow orchestration, version-controlled via Git.
- Built APIs and automation workflows to improve system reliability; **developed a Flask REST API with 12 endpoints** backed by MySQL and SQLAlchemy ORM, then **automated all ETL scheduling via Apache Airflow DAGs** on Docker Compose, eliminating manual operations entirely.
- Debugged and optimized data pipeline performance; **conducted SQL-based analysis** on borrowing trends and member activity using Pandas and Matplotlib, **producing actionable reports** integrated directly into the system's reporting module.

TECHNICAL SKILLS

Programming Languages: Python, SQL, R, C, C++

Computer Science Fundamentals: Data Structures, Algorithms, Object-Oriented Programming | Git/GitHub (Version Control)

Systems & APIs: Flask (REST API Design), SQLAlchemy ORM, Docker | MySQL, SQL (Joins, CTEs, Window Functions, Aggregations)

Data & Cloud: Apache Airflow, Apache Spark, PySpark, Hadoop, Apache Kafka | AWS (S3, EC2, Lambda), Azure SQL, Microsoft Fabric

Analytics & Tools: Scikit-learn, Pandas, NumPy, Matplotlib | Tableau, Power BI, Streamlit, Plotly

EDUCATION

New Jersey Institute of Technology

Newark, NJ

MS in Data Science | GPA: 3.5

Expected May 2027

Indus University

Ahmedabad, India

BS in Computer Science & Engineering | GPA: 3.8

May 2025

CERTIFICATIONS

- AWS Machine Learning | Amazon Web Services | Jul 2024 to Nov 2024
